

About the imitation of COM-3010PRO

Be careful. The imitation of ion measuring instrument COM-3010PRO for ores is sold in China.

The left is a genuine article.

The right is imitation.

★ Imitation seems to have decolorized the color thinly compared with the genuine article.

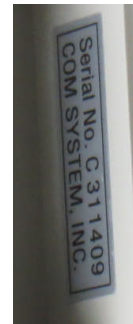

Genuine article

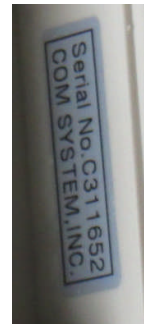

Imitation

★ Compared with a genuine article, imitation of a connector is cheap. The pin number is stamped in the larger number.

Genuine article

Imitation

★ A serial number C311652 is used.
A style of handwriting is different.

★ A genuine article protects the surface of sewing fixing brackets so that a product may not be damaged. Although carried out, there is nothing in imitation and manufacture is coarse. The belt is broken weakly at several places.
